PROFILE

Royzen is a Computer Science graduate with a strong passion for software development and a continuous drive to improve his technical skills. He has experience in building both web and mobile applications, actively contributing to various academic and personal projects that follow development best practices such as the MVC pattern, object-oriented programming, and agile methodologies like SCRUM. During his time in university, Royzen frequently collaborated with teams to deliver solutions that are not only functional but also user-friendly, applying front-end and back-end technologies in real-world scenarios.
